

## AAT-158 Latex Seam Sealer Specification Sheet

### Description:

AAT-158 is a water-latex based Seam Sealer or Buttering Latex that can be used in both “Direct Glue” and “Stretch-In” type installations. AAT-158 contains no solvents or hazardous – toxic chemical and is considered 0 VOC as defined by the SCAQMD Rule 1168. AAT-158 can be used to seal the carpet edges in a direct glue down by merely putting a 1/8” bead at the edge interface of the first piece of carpet, which lies in the spread floorcovering adhesive, and then compressing the second carpet edge into the first. AAT-158 can be used to butter carpet edges to prevent edge ravel and increase seam strength for hot melt seaming. AAT-158 can be used with carpets having backings of ActionBac®, attached rubber or urethane (Enhancer or Kanga), Hot melts, or latex or urethane unitaries. AAT-158 is not designed for PVC or Vinyl backed carpets. AAT-158 dries to an extremely strong bond, showing tensile strength which exceeds solvent based sealers for direct glue downs.

AAT-158 is totally “Environmentally Safe” and “Installer Friendly”. AAT-158 can be applied to the carpet edge using the exact same installation procedure and technique that is currently employed for all conventional sealers and edgers.
